Andrew Downing joins European Safety Systems

Released 20 June 2003

European Safety Systems, one of Europe's leading manufacturers of industrial, Intrinsically Safe and Explosion Proof sounders and beacons, has appointed Andrew Downing as Sales and Marketing Manager in succession to John Rattlidge, who has moved on within the company to take responsibility for new product developments for specific market applications.

Andrew has more than five year's experience of the audible-visual warning device markets; he joins E2S from Klaxon Signals where he was International Sales Manager. His key focus in his new role will be to develop and extend the existing global distribution network, to increase the service and support provided by the internal and external sales teams and further to extend the company's strong product portfolio of high performance warning devices for the hazardous area, marine and industrial markets.
